1. Golden Rules of the 7 Backend Keyword Boxes

Amazon KDP gives you 7 backend keyword boxes (up to 50 characters per box). Most beginners waste 80% of this space by typing single short phrases or repeating words already in their title. Follow these 5 rules:

1. DO NOT repeat words already in your Title or Subtitle (Amazon already indexes those).
2. DO NOT use commas - separate words with single spaces to maximize every 50-char slot.
3. DO NOT use forbidden subjective claims ('best seller', 'free', 'cheapest', '#1') or brand names.
4. Combine synonyms, buyer personas (adults, seniors, teens, sleuth lovers), and use-cases (road trip, rainy day, brain games, gift for mystery lovers).
5. Fill all 7 slots to 42-49 characters each.

2. 35 Ready-to-Copy 7-Slot Keyword Sets (By Theme)
